

LMHI CONGRESS
2018
5 - 8 SEPTEMBER CAPE TOWN

Contributing to Sustainable Healthcare

Professor Paolo Bellavite (Italy)

Professor Paolo Bellavite (b. 1952) graduated in Medicine in 1976 at Trieste University. He then specialized in Hematology, got a Master in Biotechnology from Cranfield University (U.K.) and a perfecting degree in Health Statistics and Epidemiology.

Since 1984 he has been professor of General Pathology, at present he's doing research at Verona University (I) as expert supervisor and teaching assistant. He is also lecturing at the Ngozi University (Burundi) in a cooperation agreement.

With his research group, Bellavite has developed research on the molecular, cellular and pharmacological aspects of inflammation, with special reference to granulocytes, macrophages and basophils, free radical formation and toxicity, platelet function and regulation.

He also developed studies on epistemology, history of medicine, scientific research in complementary medicine, effects of natural compounds on biological systems, high-dilution pharmacology (scientific bases of homeopathy), complex systems, and bioethics.

He is author of more than 250 scientific papers, over 145 of which are cited in PubMed database, and several books.
