

LMHI CONGRESS
2018
5 - 8 SEPTEMBER CAPE TOWN

Contributing to Sustainable Healthcare

**In memory of:
Dr Peter Fisher
(1950-2018)**

Today the international Homoeopathic community has been devastated by the loss of one of the great homoeopaths of our time, Dr Peter Fisher. His contributions to the Homoeopathic profession, the respect he earned from practitioners and patients alike and his dedication to the advancement of the science of homoeopathy set him apart and earned him the high honour of caring for not only Her Majesty the Queen, but all those who were so fortunate to be in his care.

The LMHI 2018 Organising Committee, the Homoeopathic Association of South Africa and all those who will be setting out to attend the LMHI 2018 Congress are devastated by the passing of Dr Peter Fisher and today share in the sorrow and grief of his untimely passing.

We urge all Homoeopaths to take a moments silence, to reflect on the tragic passing of our fellow Homoeopath and colleague and pause to celebrate the contribution and legacy that he has left behind. May we all be reminded, today and always, to strive to the level of mastery, of commitment and of contribution that Dr Peter Fisher achieved in his life.

LMHI 2018 Organising Committee
and
Homoeopathic Association of South Africa (HSA)
